Señor
Carlos Pavez Tolosa
Superintendente de Valores y Seguros
Av. Libertador Bernardo O'Higgins N° 1449, piso 1
PRESENTE

REF.: Adjunta información relevante que se publicó en el U.S. Securities and Exchange Commission (SEC) el día de hoy.

Señor Superintendente:

En virtud de lo establecido en la Norma de Carácter General N°352, por medio de la presente adjunto información considerada como relevante para la empresa, que ha sido entregada el día de hoy en el U.S. Securities and Exchange Commission ("SEC"), en donde mediante un comunicado de prensa se informa la suscripción de un acuerdo con Petróleos del Perú S.A., a través del cual GeoPark adquiere una participación del 75% en el Bloque Morona, localizado en el norte del Perú. GeoPark será la operadora de dicho bloque.

La información adjunta consiste en un comunicado de prensa de tres páginas escrito en idioma inglés.

Sin otro particular, saluda atentamente a Usted,

Pedro Aylwin Chiorrini

GEOPARK

FOR IMMEDIATE DISTRIBUTION

GEOPARK ANNOUNCES ENTRY INTO PERU WITH ACQUISITION OF THE MORONA BLOCK

Santiago, Chile -- October 2, 2014 -- GeoPark Limited ("GeoPark") (NYSE: GPRK), the Latin American oil and gas explorer, operator and consolidator with operations and producing properties in Chile, Colombia, Brazil and Argentina, today announces that it has executed a Joint Investment Agreement and Joint Operating Agreement with Petróleos del Perú S.A. ("Petroperu") to acquire an interest in and operate the Morona Block located in northern Peru. GeoPark will assume a 75% working interest ("WI") of the Morona Block, with Petroperu retaining a 25% WI. The transaction has been approved by the Board of Directors of both Petroperu and GeoPark.

The Morona Block, also known as Lote 64, covers an area of 1.9 million acres on the western side of the Marañón Basin, one of the most prolific hydrocarbon basins in Peru. More than 1 billion barrels of oil have been produced from the surrounding blocks in this basin. The Morona Block contains the Situche Central oil field, which has been delineated by two wells (with short term tests of approximately 2,400 and 5,200 bopd of 35-36° API oil each) and by 3D seismic. The independent reservoir engineering firm, Ryder Scott, has certified proven and probable (2P) reserves of 55 million barrels of oil (mmbo) and 3P reserves of 85 mmbo for the Situche Central field for Petroperu. GeoPark used a 2P reserve estimate of 30-40 mmbo for its internal evaluation of this project.

In addition to the Situche Central field, the Morona Block has a large exploration potential with several high impact prospects and plays – with exploration resources currently estimated to range from 200 to 600 mmbo. This important component of the project will significantly increase GeoPark's overall inventory of exploration resources and complement GeoPark's growing reserve and cash flow base already established in Colombia, Chile and Brazil. The Morona Block includes geophysical surveys of 2,783 km (2D seismic) and 465 sq km (3D seismic), and an operating field camp and logistics infrastructure. The area has undergone oil and gas exploration activities for the past 40 years, and there exist ongoing association agreements and cooperation projects with the local communities.

The expected work program and development plan for the Situche Central oil field is to be completed in three stages. The goal of the initial stage will be to put the field into production through a long term test to help determine the most effective overall development plan and to begin to generate cash flow. This initial stage requires an investment of approximately \$140 million to \$160 million and is expected to be completed within 18 to 24 months after closing. GeoPark has committed to carry Petroperu during this initial phase and has the funds and cash flow to support this program.

The subsequent work program stages, which will be initiated once production has

been established, are focused on carrying out the full development of the Situche Central field, including transportation infrastructure, and new exploration drilling of the Block. Petroperu will also have the right to increase its WI in the Block up to 50%, subject to GeoPark recovering its investments in the Block by certain agreed factors.

James F. Park, Chief Executive Officer of GeoPark, said, "This is a potentially transformational acquisition for GeoPark – and a great strategic fit for our existing Latin American project portfolio. We are excited to be entering into Peru – a culturally-rich country with immense hydrocarbon potential and a secure and attractive economic and political environment. The Morona Block has all the attributes we look for: a discovered oil field with the opportunity to establish production and cash flow in the near term; an agreed work program that is technically-sound and fits our budget; a big exploration upside within a proven hydrocarbon system in a prolific oil region; and a great partner, Petroperu, who has a strong presence throughout the region. The Marañón Basin is a priority target for us in Latin America and we see this as a unique opportunity to enter into a potentially high value-generating project and to approach it in a new way – both below and above ground. In addition to our oil-finding and operating track-record, one of GeoPark's strengths is our commitment to building long term mutually-beneficial relationships, based on transparency, dialogue and respect, with the communities where we operate."

The transaction is subject to customary conditions, which include the qualification of GeoPark as an operator by PeruPetro, the Peruvian petroleum licensing agency, certain license modifications and a presidential decree. The transaction is expected to close by the first quarter of 2015.
